

PPP Project Checklist

A quick preparation checklist for sponsors of strategic infrastructure and public-private partnership projects.

Project definition

Clarify public need, service outcomes, technical scope, location, demand assumptions, and stakeholder map.

Commercial structure

Identify revenue model, risk allocation, capex/opex estimates, counterparties, and bankability constraints.

Permits and safeguards

Map legal approvals, land issues, environmental and social requirements, and community engagement needs.

Investor package

Prepare teaser, data room, financial model, procurement route, timeline, and government decision points.

Aftercare plan

Define implementation governance, reporting cadence, issue escalation, local content, and expansion pathway.
